

**Vermont Department of Banking, Insurance, Securities  
and Health Care Administration  
Division of Health Care Administration**

## **VERMONT HEALTHCARE CLAIMS UNIFORM REPORTING AND EVALUATION SYSTEM:**

**APPLICATION FOR A LIMITED USE  
HEALTH CARE CLAIMS RESEARCH DATA SET**

## **INTRODUCTION**

To the extent allowed by federal HIPAA provisions, the Vermont State Legislature authorized the Department of Banking, Insurance, Securities and Health Care Administration (the department) to collect health care eligibility and medical and pharmacy claims data from health insurers to be available as a resource for insurers, employers, providers, purchasers of health care, and state agencies to continuously review health care utilization, expenditures, and performance in Vermont. (18 V.S.A. § 9410) Provisions addressing releases from the claims data set are addressed in state regulation H-2008-01. Information and documentation about the VHCURES program are posted on the department's web site at [www.bishca.state.vt.us](http://www.bishca.state.vt.us).

The Vermont Healthcare Claims Uniform Reporting and Evaluation System (VHCURES) data collection program produces consolidated claims data sets that are updated on a periodic basis. Record-level files containing "unrestricted" data elements are available in a public use file (PUF). Limited use health care claims research data sets (limited use data sets) containing specified "restricted" data elements are available to users and for uses approved by the department. Approved users are responsible for covering the cost of the files or technical assistance provided by the department's designated contractor managing the consolidated VHCURES data set.

Requestors seeking the release of a limited use health care claims research data set must complete this application for review by the department and have a data use agreement with the department. Approved users wanting to retain and use limited use data sets for longer than 2 years may be required to reapply.

Authorized users conducting research and analysis on behalf of the department must complete another version of this application titled, "Authorized User Application" and have a data use agreement with the department.

If the department declines to release a requested limited use data set, it will provide within 60 days of receipt of the application a written statement identifying the specific criteria that are the basis for denial of the application. The requestor shall have leave to resubmit or supplement the application to address the Commissioner's concerns. Any adverse decision regarding an application may be appealed within 30 days by filing a request for hearing with the Commissioner pursuant to Department Rule 82-1.

## **INSTRUCTIONS FOR COMPLETING AND SUBMITTING THE APPLICATION**

Applicants must complete all required sections of the application and include adequate detail to support a thorough review of the application by the department. Applications that are incomplete will not be reviewed until the applicant has provided all required information.

The Commissioner may request a review of an application by the VHCURES Data Release Advisory Committee. See Section 8 of state Regulation H-2008-01 for detailed information about the committee.

Applicants must submit one (1) copy of the completed application in electronic format via electronic mail and three (3) hard copies to the contact for the department listed below. The electronic filing of the completed application must include all supplementary materials and attachments being submitted as part of an application.

The contact at the department for questions about the VHCURES program including the application process and for routing completed applications is:

Dian Kahn  
Director of Analysis and Data Management  
BISCHA  
89 Main Street, Drawer 20  
Montpelier, VT 05620-3101  
(802) 828-2906  
Dian.Kahn@state.vt.us

## **SECTION 1: APPLICANT CONTACT AND QUALIFICATION INFORMATION**

### **1-1. Principal Investigator**

*The person in charge of a project that makes use of limited use research health care claims data sets and who is the custodian of the data responsible for the observance of all conditions of use and for establishment and maintenance of security arrangements to prevent unauthorized use.*

Principal Investigator Name: Jim Hester

Title (if applicable): Director

Principal Investigator Organization: Health Care Reform Commission

Street/PO Address: 14-16 Baldwin St

City/State/ZIP: Montpelier VT 05633

Phone Number: 802 828-1107

Email address: jhester@leg.state.vt.us

Fax Number:

Web Address (if applicable):

### **1-2. Organizational Affiliation of Principal Investigator (if applicable)**

*Complete this section if the principal investigator is not a member or permanent employee of the organization that is requesting the research or study for which the limited use health care claims limited use data set is being requested.*

Organization Name:

Organization Contact Name:

Organization Contact Title:

Street/PO Address:

City/State/ZIP:

Phone Number:

Email address:

Fax Number:

Web Address (if applicable):

### **1-3 Principal Investigator Contact Person (if different from Principal Investigator)**

Name: Steve Kappel

Title: Consultant

Complete if different from the Principal Investigator information under 1-1:

Street/PO Address: 1855 North Street

City/State/ZIP: Montpelier, VT 05602

Phone Number: 802-522-0986

Email address: sjkappel@policyintegrity.com

Fax Number:

**1-4. Description of Principal Investigator Professional Qualifications**

*Describe education, training and previous research experience, publications, affiliation with a university, private research organization, medical center, government agency, or other institution that will provide sufficient research resources. Attach resume for this section if it provides adequate description of qualifications.*

Resume attached. Dr. Hester is also the Principal Investigator for the ACO modeling project financed by the Commonwealth Fund which will be using the data file.

Attachment Filename (File must be included in electronic submission of this application):

**2010-01\_Hester\_Resume.doc**

**2010-01\_Hester\_Publication\_CommonwealthFund.pdf**

**2. Additional Project Staff with Access to the Limited Use Health Care Claims Research Data Set (if any)**

*List the names of all staff on project, including contractors, who will have access to the data and provide their qualifications.*

**2 (a). Additional Project Staff Person #1**

Name: Steve Kappel

Title: Consultant

Organizational Affiliation/Employer: Policy Integrity LLC

Project Role: Data management and analysis

Qualifications: 25 years of health utilization and financial analysis

Attachment Filename: **2010-01\_Hester\_Kappel\_Resume.doc**

**2 (b). Additional Project Staff Person #2**

Name: Greg Peters

Title: Consultant

Organizational Affiliation/Employer: Lake Champlain Capital Management LLC

Project Role: Consultant

Qualifications: Developed financial model for Blueprint for Health

**2 (c). Additional Project Staff Person #3**

Name: Mike Del Trecco

Title: Vice President

Organizational Affiliation/Employer: VT Association of Hospitals and Health Systems

Project Role: Advisor

Qualifications: Responsible for VAHHS data sets

**2 (d). Additional Project Staff Person #3**

Name:  
Title:  
Organizational Affiliation/Employer:  
Project Role:  
Qualifications:

**2 (e). Additional Project Staff Person #3**

Name:  
Title:  
Organizational Affiliation/Employer:  
Project Role:  
Qualifications:

**SECTION 2: RESEARCH PROTOCOL**

*Complete the information below in summary format and attach a copy of the research protocol to provide detailed information. In addition, If you have an approval from an Institutional Review Board for your study, attach that information to this application.*

**2-1. Research Protocol Filename** (File must be included in electronic submission of this application): **2010-01\_Hester\_ResearchProtocol.doc**

**2-2. IRB Study Approval Filename** (If applicable, file must be included in electronic submission of this application): Not applicable

**2-3. Summary of background, purposes, and origin of the research:**

Vermont's health care reform strategy has been based on a comprehensive set of initiatives which have included

- expanding coverage for care to reduce the uninsured population to 4% by 2010
- accelerating the implementation of health information technology as a catalyst for improving performance of the health system
- bending the medical cost curve through delivery system reform to improve the prevention and treatment of chronic illnesses.

Payment reform has long been recognized as an essential component of the last component - successful delivery system reform. Vermont has already implemented a unique set of enhanced medical home pilots which combine an all payer (Medicaid, Medicare and commercial insurer) model of medical home payments to primary care practices with support for new local care coordination teams which enable the practices to function as a true medical home. However, bending the medical cost curve requires expanding the payment reform to encompass the complete local delivery system including the local hospital, specialist physicians and other key caregivers.

During its 2009 session, the Vermont State Legislature passed legislation (S.129, Section 6) supporting the implementation of a pilot Accountable Care Organization site as the

next phase of payment reform in Vermont's health care reform. The legislation supported the development of applications by Vermont provider organizations for programs such as the national ACO learning collaborative being developed by the Dartmouth Institute for Health Policy and Clinical Practice and the Brookings Institution. The legislation followed up on the findings of the ACO pilot feasibility study conducted by the Health Care Reform Commission in 2008 as authorized by Act 203 (Section 2), which instructed the Commission to "...assess the feasibility of alternative designs for a pilot project to test using a system-wide budgeting initiative at the regional level within the state, including a design based on the accountable care organization model.

The Commonwealth Foundation has provided funding to the Health Care Reform Commission to develop a financial model for use by organizations interested in considering becoming ACOs. This model has been built in anticipation of the availability of VHCURES data.

**2-4. Statement of the health-related problem or issue to be addressed by the research:**

Can changes in provider organization and reimbursement "bend the cost curve" while improving quality of care?

**2-5. Research design and methodology, including either the topics of exploratory research or the specific research hypotheses to be tested:**

This is an exploratory project whose main goal is to assist Vermont organizations in making informed decisions about becoming Accountable Care Organizations (ACOs). As part of this information process, organizations will be provided with newly-developed information about health care costs and utilization using different definitions of populations to be served.

Initial modeling has used published VHCURES analyses, which rely on the current BISHCA hospital service area definitions. Most approaches to ACO development assume a population which is connected to the organization by actual utilization, rather than by geographic proximity. This distinction is especially important given that most Vermont hospitals' shares of their HSA utilization are 60% or less. At the same time, actuarial studies have indicated that ACOs would require a "critical mass" in order for any expenditure targets to be reliable.

The purpose of this research is to explore how different population definitions may impact ACO viability. This will be done by developing different assignment methodologies based on factors such as use of a local primary care physician or proportion of total expenditures accounted for by the local health care system. We will also explore the proportion of the population with no health care utilization and how those people might be assigned to ACOs for the purpose of creating a target and measuring actual experience against it.

**2-6. The procedures that will be followed to maintain the confidentiality of any data or copies of records provided to the principal investigator:**

Data will be stored in an encrypted file on either the local hard drive of a password-protected personal computer or on a removable external drive.

Questions from Advisory Committee and Responses

- How will access to the personal computer and removable hard drive be controlled and limited? Data will be stored in encrypted files. Only one person (Kappel) will have the password to access the files.
- Who will have direct access to the released file of record-level data? Kappel
- Who will have access and how will access to the data extracted from the original released file containing any tabulations derived from restricted data elements be limited? Investigators listed above.
- What provisions are being made to hold people accountable for security of the data being released or extracted from the released dataset? No individual-level information will be released. Tabulations will be released only when there is no possibility of identification of individual providers or patients.
- Will data (original file or extracted/copied files) be transferred to laptops and/or thumbdrives or other storage devices? How will access to that be controlled and limited? No
- How will the released data be expunged and destroyed once the approved use of the data is completed? Secure file erasure procedures that comply with federal requirements.

**2-7. The intended research completion date** (Studies that take longer than 2 years shall require annual approval and renewal from the department): December, 2010

**SECTION 3: PRICES FOR DATA SETS**

*Limited use research health care claims data sets approved by the Department shall be made available to the requesting party at the cost set below by the Department's designated vendor to process the approved data extract. The price below does not include the cost of additional programming and consulting services that requestors may procure from the vendor. Approved users will be invoiced by the vendor and are responsible for their own payment arrangements with the vendor. Payment for the data and any additional consulting services procured from the vendor are to be made directly to the vendor.*

BISHCA Designator Vendor:

Onpoint Health Data  
16 Association Drive  
Manchester, ME 04351  
207 430-0632  
207 622-7086 fax

[www.OnpointHealthData.org](http://www.OnpointHealthData.org)

The extract price is \$5,200 for an extract of multiple years of incurred claims and eligibility data including the services and products listed below from the designated vendor. This includes extracts only from existing warehouse data sets for up to 5 years of incurred data. The Vermont warehouse has a start date of January 2007 for incurred claims and eligibility files.

- Define data output specifications
- Data extract of claims and eligibility records up to 5 years incurred
- Provider master table extract
- Local CPT/Diagnosis table extract
- Client review and release of extract including dictionary documentation

The extract price does not include any conditional programming on the part of the vendor to meet clients' customized conditions or research methodologies. For example, the vendor will not extract diabetic patients or radiology services or other defined subsets without additional cost as required for vendor consultation and programming.

#### **SECTION 4: ROUTING AND DELIVERY**

*Password-protected data files will be shipped via UPS or FedEx, unless otherwise requested. Please provide your UPS or FedEx billing number and any other relative shipping information.*

UPS Billing Number:

FedEx Billing Number:

Other Shipping Options: Requestor will discuss shipping arrangements with Onpoint Health Data.

Ship to the attention of (Name): Steve Kappel

Shipping Address: 1855 North Street

Montpelier, VT 05602

#### **SECTION 5: SPECIFICATION OF REQUEST FOR LIMITED USE DATA SET**

*In the subsections below below, the applicant needs to indicate the time period, minimum needed specific data elements, justify need for potentially indirect patient identifiers, and indicate minimum needed specificity needed for indirect patient identifiers, and selection criteria for the minimum needed data records required.*

5-1. Please indicate the type of data and time period requested. *Note: data is collected on an incurred basis starting with January 2007 and will be available on quarter-by-quarter time periods. A sixth month lag on payments to account for claim payment run out is recommended.*

Data Set	Incurred Time Period
(X) Member Eligibility	2007, 2008, 2009
(X) Medical Claims	2007, 2008, 2009
( ) Pharmacy Claims	

5-2. If your study requires additional time periods beyond those noted above, please indicate period (*note: requests for receipt or retention of data beyond two years after receipt of initial data will require annual renewal.*): Not requested

5-3. Data will be supplied in a delimited text file format. Due to the size of the data this is the recommended format. For smaller subsets of records, other formats may work. Please indicate any special format or layout of data requested by the principal investigator and we will try to accommodate the need: Not requested

5-4. If applicable, provide a detailed specification for any summary data tables and reports that you are requesting the Department’s designated vendor, Onpoint Health Data to generate *at your cost* for your research using restricted ( R ) data elements per tables 1-3 in this section. This includes all summary data tables and reports that include information using calculated variables based on restricted data elements: See **2010-01\_Hester\_ResearchProtocol.doc**

5-5. Tables 1-3 below include a listing of public use (P) and restricted (R) data elements. Check the both the public (P) and restricted (R) data elements that you are requesting for your research. This is applicable to both data extracts and customized summary data tables and reports that you are requesting the Department’s designated vendor to generate for your research as described in sections 2 and 5-4 (if applicable). Select only those elements needed for your research and provide a justification for need. Specify any sub-selection of records or grouping of values you expect to use for each data elements. **Applicants must provide complete information in Tables 1, 2, and 3 below regarding Need/Filter/Group for every data element requested regardless of release status.** *Please use as much space as you need.*

- *Need:* We will only provide the minimum set of information with the minimum specificity that you need. Please supply a need for elements below with Need listed to the right of element. Data elements may be denied if your application does not justify your need explicitly when required.
- *Sub-selection of Records (Filters):* We will only release the minimum set of records needed for your study. Please provide any selection criteria for the records you are specifically interested in. For instance, if you specifically want to

study children, we would release records for the specified age range. If you are studying women's health, we would only release records for adult females.

- *Grouping of Values:* Where relevant, we will provide data elements pre-grouped. Please indicate any grouping that is needed for your study. For instance, if you only need to know information based on specified age groups, we can recode single-year age into relevant age groupings.

**Note from Applicants:** These are the individual fields necessary for aggregation. Aggregation / grouping: 1 record per year, with sum of covered months in that year. Aggregation methodology has been developed with Onpoint staff. See **2010-01\_Hester\_DataRequest\_Addendum.doc**
